- ★ Aid Station
- - - Park Boundary

DISTANCES PER LOOP

Aid Station	Leg	Total
Dogwood	0.00	0.00
Nature Center	3.10	3.10
Dam Road	3.09	6.19
Dam Road	6.01	12.20
Park Road	3.41	15.61
Dogwood	4.39	20.00
		x 5 loops =
		100 Miles

Official TPWD Map of Huntsville State Park Trails modified by Chris Matus, June 2008. Map was created for the 2009 Rocky Raccoon 100 Mile Trail Run and is for general location purposes only. For an official park map, please see the Park Headquarters or the TPWD web site - <http://www.tpwd.state.tx.us/>. Optimized to print on 11x17 size paper.

Trail distance listed is the distance between distance markers. Trails were measured with a Rolatope 600 series wheel and/or a mountain bike outfitted with a Cateye Enduro 8 computer calibrated to the rolling circumference of the tire. Trail location was acquired with a Garmin Forerunner 305 GPS. GPS tracks were then georeferenced in a GIS program by latitude and longitude (geographic projection, decimal degrees, WGS84 datum). Map labeling was done in Adobe Illustrator.
